

Crown Bar

*Crown Bar, Shaker Screen Protector,
Bar Rail, Wear Strip, Lip Seals*

DACON's™ rubber crown bar is designed to greatly reduce shock and vibration to the shaker screen and extend the life of the frame end screen. Our proprietary blend of rubber is formulated specifically to resist tears, cuts and provides superior weather resistance. Our Crown bar channel is used in aggregate yards & mines all over North America, and is available in extra heavy top for even the toughest situations.

DACON™ offers a complete line of shapes & sizes that assures we have a solution for any crown-bar application you have.
